

BIBI TABASSUM

ABOUT ME

I am a student of Artificial Intelligence with strong skills in C++ and web development.

I have studied and applied machine learning concepts, including object detection and ML model development.

I have developed projects such as a portfolio website, chatbot interface, and various machine learning-based applications.

I continuously explore new technologies and improve my problem-solving and development skills.

I aim to grow as a developer and contribute to innovative and impactful AI-based solutions.

EDUCATION	WORK EXPERIENCE
Matriculation() Government High School Koheray — Completed intermediate() slamia College Peshawar — Completed Bachelors Degree in Artificial intelligence 28/9/2023 to 26/7/2027 Abdual Wale Khan University Mardan SKILLS • Programming: C++, Python - Web: HTML, CSS, JavaScript • AI/ML: Machine Learning, Object Detection • Tools: Debugging, Data Preprocessing • CERTIFICATIONS / TRAINING • 3-Month Training Program at UET • Hands-on experience in AI and Machine Learning projects • INTERESTS • Artificial Intelligence, Machine Learning, Web Development, Innovation in Technology	3-Month Training at UET Mardan • Completed a 3-month training program at UET, gaining practical experience in technical and engineering skills. IEEE Membership • Member of IEEE (Institute of Electrical and Electronics Engineers), actively participating in academic and technical activities. General Secretary – Women Empowerment Society • Served as General Secretary, contributing to leadership, coordination, and event management activities. AI & Web Development Projects • Developed multiple projects including chatbots, object detection systems, and machine learning applications. Technical Skills & Experience • Gained hands-on experience in C++, web development, and building real-world AI-based software solutions. • PROJECTS • CAI Chatbot (Gemini-based): Built an AI chatbot with file upload, image preview, and theme customization using Gemini API. • Personal Portfolio Website: Designed a responsive portfolio website to showcase skills, projects, and contact information. • Email Spam Detection System: Created a machine learning model to classify emails as spam or not spam using Python and Flask. • Currency Conversion Chatbot: Developed a chatbot that converts currencies in real-time using live exchange rate APIs. • Health AI Chatbot: Built an AI-based chatbot to provide basic health-related guidance and responses using intelligent models.
